DYMAX Acquires Dispensing Leader Tridak

DYMAX Corporation, world-leading manufacturer of advanced light-curing adhesives, coatings, and curing equipment, is pleased to announce the acquisition of Tridak of Danbury, CT. Tridak is a leading designer and manufacturer of standard and custom equipment for dispensing and filling virtually any material, whether it's an adhesive, paste, solvent, lubricant, or dental material. This acquisition expands DYMAX's capabilities to supply adhesives and other materials, the equipment to dispense them, and the systems to cure them.

Tridak has been developing precision dispensing and filling solutions for over 30 years. Both DYMAX and Tridak share a common problem-solving philosophy – if they don't already have what you need, their engineers will work with you to develop the solution. Custom applications are a substantial part of Tridak's business. They are proud of their reputation of being a fast-reacting, one-stop solution to whatever dispensing application challenge a potential customer might have.

Tridak operations will move from Danbury, CT, to a larger DYMAX facility in Torrington, CT, enabling greater synergy of research, engineers, and manufacturing.
