DYMAX UV Conformal Coatings and Adhesives Documented Halogen-Free

DYMAX Corporation's UV conformal coatings, encapsulants, adhesives, and potting materials for electronic applications are documented by an independent laboratory to meet or exceed the halogen-free standards set forth in IEC 61249-2-21. Halogen-free declarations give users up-front confidence that materials will meet back-end requirements. Halogen-free test reports are available online at www.dymax.com for reference by users.

DYMAX has not changed or altered existing formulas to meet halogen-free requirements. Rather, the company's halogen-free formulations have been the global standard for rapid, environmentally friendly electronic assembly for years. DYMAX offers a wide variety of halogen-free conformal coatings, adhesives, potting materials, and more to meet industry mandates without sacrificing performance requirements.

DYMAX Corporation is a leading technology-based company specializing in the formulation, manufacture, and service of advanced assembly adhesives, coatings, epoxies, masking resins, and light-curing systems.
