### **DYMAX Corporation Earns Position as One of the Fastest-Growing Companies in the U.S.**

Inc. has, for the third year in a row, identified DYMAX Corporation as one of the 5000 fastest-growing private companies in the country. The Inc. 5000 list represents the most comprehensive look at the most important segment of the economy – America's independent-minded entrepreneurs. Taken as a whole, these companies represent the backbone of the U.S. economy.

“Savvy trend spotters and those who invest in private companies know that the Inc. 5000 is the best place to find out about young companies that are achieving success through a wide variety of unprecedented business models, as well as older private companies that are still expanding at an impressive rate,” said Inc. 5000 project manager Jim Melloan. “That’s why our list is so eagerly anticipated every year.”

Andrew G. Bachmann, founder of the DYMAX Corporation, grew the company from an invention developed in a basement laboratory into a global supplier of structural adhesives, coatings, encapsulants, and UV curing systems widely used in the medical, electronic, and aerospace industries. His commitment to providing manufacturers with improved assembly solutions through light-curing adhesives and equipment led to the development of over 30 patents, including fluorescing adhesives and adhesives that can cure through semi-opaque and UV-inhibited plastics.

Over 30 years later, the products manufactured by DYMAX continue to provide design engineers with tools to dramatically improve manufacturing efficiency and lower their costs. DYMAX, an ISO 9001:2000 certified company, serves the assembly needs of the medical, electronic, optical, military, automotive, appliance, metal finishing, and industrial markets worldwide.

The 2009 Inc. 5000 serves as a unique report card on the U.S. economy. Despite the ongoing recession, aggregate revenue among the companies on the list actually increased to \$214 billion, up \$29 billion – nearly 16 percent – from last year, with a median three-year growth rate of 126 percent. The Inc. 5000 are responsible for creating more than one million jobs since their founding, making the list perhaps the best example of the impact private, fast-growing companies can have on the economy. Complete results of the Inc. 5000, including company profiles and an interactive database that can be sorted by industry, region, and other criteria, can be found on [www.inc.com](http://www.inc.com).

DYMAX Corporation is a leading technology-based company specializing in the formulation, manufacture, and service of advanced assembly adhesives, coatings, epoxies, masking resins, and light-curing systems.
