### **DYMAX Light-Curable Maskant Offers Surface Protection During Harsh Environment Processing**

*SPEEDMASK*<sup>®</sup> 730-BT is a masking resin formulated to provide excellent surface protection during chemical milling/etching, plating, anodizing, and aggressive grit-blasting operations aiding in the manufacturing, overhaul, repair, and rework of turbine engine blades, vanes, and other turbine components as well as many other metal finishing applications. 730-BT is impervious to most acid and alkali solutions. This next-generation maskant is trimmable for complex configurations while still maintaining edge tension to prevent leakage and damage to the substrate underneath.

*SPEEDMASK* 730-BT is a fast, light-curable, solvent-free, organic resin designed for spray, dip, or brush masking of components. Used as a temporary protective coating, *SPEEDMASK* 730-BT is a replacement for environmentally hazardous and time-consuming solvent- or water-based maskants. 730-BT requires no mixing prior to use. When cured, it provides surface protection from chemical processing of nickel alloys, steel, titanium, stainless steel, aluminum, and glass.

DYMAX Corporation is a leading technology-based company specializing in the formulation, manufacture, and service of advanced assembly adhesives, coatings, epoxies, masking resins, and light-curing systems.

For more information, contact DYMAX Corp., 318 Industrial Lane, Torrington, CT 06790; Phone: 860-482-1010; Fax: 860-496-0608; Toll Free: 1-877-DYMAX-UV (1-877-396-2988); e-mail: [info@dymax.com](mailto:info@dymax.com) or visit our website at [www.dymax.com](http://www.dymax.com).

### CAPTION

***SPEEDMASK®*** 730-BT offers surface protection during harsh environment processing.
