DYMAX Applauds Breakthrough on Korea FTA

President Obama has announced that a final agreement has been reached on the U.S.-Korea Free Trade Agreement (FTA), which had been stalled for over three years, and that the trade deal would be submitted to Congress for approval. [DYMAX Corporation](#), a global manufacturer and supplier of industrial adhesives and light-curing equipment, issued the following statement regarding this announcement:

“We welcome the positive news that the two governments have reached consensus on the outstanding concerns of the U.S.-Korea FTA and urge Congress to listen to the American people’s demand for economic growth and jobs by passing this agreement as quickly as possible,” said Greg Bachmann, President of DYMAX Corporation.

“The U.S.-Korea FTA will immediately eliminate the 6.5 to 8-percent tariffs we face on our products so that we can expand our sales to Korean clients. With the EU-Korea FTA set to go into effect in July 2011, we have no time to lose so that U.S. companies can capture the benefits of new access to the Korean market before our other global competitors do. Pass the agreement now so that America can get back on the road to economic recovery.”

Founded in 1980 and headquartered in Torrington, Connecticut, DYMAX’s products and technical solutions enable design and manufacturing engineers to improve manufacturing efficiency and lower their total processing costs. DYMAX has been an international player since its founding 30 years ago. In April 2010, DYMAX opened a sales

office in Seoul, Korea, and received the U.S. Department of Commerce Export Achievement Certificate, recognizing the company's innovation and increased exportation. DYMAX supports the U.S.-Korea FTA to boost the company's competitiveness and increase exports into Korea's dynamic economy.

In addition to their headquarters in Torrington, DYMAX has locations in [Germany](#), [China](#), [Hong Kong](#), and [Korea](#) which serve the assembly needs of the [medical](#), [electronic](#), [optical](#), [automotive](#), [appliance](#), [metal finishing](#), [power generation](#), and [industrial](#) markets worldwide.

[DYMAX Corporation](#) is a leading technology-based company specializing in the formulation, manufacture, and service of advanced assembly [adhesives](#), [coatings](#), [epoxies](#), [masking resins](#), and [light-curing systems](#).
