

Why Choose UV?

UV and visible light-curing processes frequently offer significant opportunities for reducing the total manufactured cost of many products. A few reasons for this are:

- Cures in Seconds
- Cures Only When Exposed to Light
- One Part
- Ease of Storage, Application, and Maintenance of Dispensing Equipment
- Good Gap Cure
- Long Shelf Life
- Room-Temperature Storage

The graph below shows some of the benefits and opportunities for cost savings available with light-curing technology.
